A von Neumann algebra is a unital \ast -subalgebra of the algebra of bounded operators on a Hilbert space, closed in the weak operator topology. Also called a W^* von Neumann algebra factor in nLab In the last ten years impressive work has been done at the interface between ergodic theory and von Neumann algebras. The purpose of this PhD course is to von Neumann algebras In mathematics, a von Neumann algebra or W^* -algebra is a \ast -algebra of bounded operators on a Hilbert space that is closed in the weak operator topology and .
